

# Price of exporting a cabinet of solar modules

## Overview

---

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500. Ever wondered how solar panels survive the journey from factories in China to solar farms in Europe or rooftops in Australia?

This guide dives into the critical steps of photovoltaic panel export and cabinet loading, offering actionable insights for suppliers, installers, and project developers. This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories. Where possible, imports and. Thinking of going solar and want to know how much it will cost to ship those panels in a shipping container?

You're not alone. With renewable energy on the rise, particularly among off-gridders, businesses, and environmentally minded homeowners, solar panel shipping logistics are growing more. Each year, the U. ■ Module price does not impact absolute transport costs (€/module) but high impact on transport cost share → lower module prices increase transport cost share ■ Transport costs can account for up to 43% of final module. As per Volza's Global Export data, Solar modules export shipments stood from World at 642. 1K, exported by 17,006 World Exporters to 17,967 Buyers.
