Tariffs, cost recovery and subsidies

Chile represents the world's longest running comprehensive electricity reform in the post-World War II period. The reform was led by the 1982 Electricity Act, which is still the most important law regulating the organization of the electricity sector in the country. The reform was similar to the UK's model and started with vertical and horizontal unbundling of generation, transmission and distribution in 1981. According to Cambridge economist Michael Pollitt, the reform is widely regarded as a successful example of electri...
