

# Senegal Photovoltaic Energy Storage Container Wind- Resistant Type

## Overview

---

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country of over 18 million people moves to strengthen its electricity grid. Urgent need to stabilize the grid, due to the high share of renewable production in the energy mix. The project will increase the current spinning reserve by 40% and will provide additional services such as frequency control, island functioning and Black-Start capability. Battery storage is. Dakar, Senegal, Aug- Just one year after laying the foundation stone, Africa REN announces the commercial commissioning of Walo Storage, the first photovoltaic facility in West Africa combined with lithium-ion battery storage, designed for frequency regulation and to meet local energy. Dakar, Senegal, Aug- Just one year after laying the foundation stone, Africa REN announces the commercial commissioning of Walo Storage, the first photovoltaic facility in West Africa combined with lithium-ion battery storage, designed for frequency regulation and to meet local energy. The vertically integrated and state-owned electric utility, SENELEC, maintains a monopoly in transmission and distribution (outside certain rural zones where private concessions are allowed) and is the main counterpart to IPPs for power purchase agreements (PPAs).
