

# Should the photovoltaic panels be fixed horizontally or vertically

## Overview

---

Recommendation: Horizontal as the primary choice, vertical as a supplementary option. Most homes achieve better results with a horizontal orientation, especially when aiming to capture the most sunlight on the panels. However, vertical installation can also be effective. Solar panels can produce the same amount of power regardless of orientation. Still, you should be strategic with placement. Are you doing a solar project?

Modernize can pair you with three to four pros in your area, so you can compare options and save time and money. The two most common orientations are: 1.
