

Sine outdoor power supply specifications and models

Overview

The new SureSine off-grid inverter line is comprised of six new power output classes from 150-2,500W with 120 or 230V output and 12, 24 or 48V DC input options to cover a wide range of off-grid applications requiring a high-performance, industrial-grade, pure sine wave inverter. The new SureSine off-grid inverter line is comprised of six new power output classes from 150-2,500W with 120 or 230V output and 12, 24 or 48V DC input options to cover a wide range of off-grid applications requiring a high-performance, industrial-grade, pure sine wave inverter. Achieves over 90% efficiency with 6000W peak surge for reliable power. Features electronic protections and GFCI for added safety and peace. Compatible with various. Pure sine wave power output helps protect the lifespan of even your most power-hungry appliances. Recycled cardboard content is minimum 70% (50% in US). Available in 2000W-3000W capacities, they convert DC power (from batteries or solar panels) to stable AC power—protecting your electronics while keeping electricity flowing, whether you're at home, camping, or running a mobile stall. They are fully compatible with anything from computers to refrigerators and even important medical equipment—without. The constant annoyance of unstable power in off-grid setups is finally addressed by a truly reliable pure sine wave inverter.
