

Solar container outdoor power only works when plugged in

◆ **PRODUCT INFORMATION** ◆

The image shows a tall, grey and white Energy Storage System (ESS) unit. The front panel is white and features a small digital display and control buttons. The side panel is grey with a perforated ventilation grille. A red emergency stop button is located on top of the unit. The model number 'DW-ESS-100P-200' is printed at the bottom of the front panel.

-  **BATTERY CAPACITY**
50kWh~500kWh
-  **DC VOLTAGE RANGE**
400V~1000V
-  **DEGREE OF PROTECTION**
IP54
-  **OPERATING TEMPERATURE RANGE**
-10~50°C

Overview

A solar outdoor outlet works only during the daytime, as it does not have a battery to store energy. You are correct that no charging can. I have a 200 watt external solar panel and charge controller that works great when connected directly to the battery. The convenience is way better too. Assess the battery storage; when solar power cannot be plugged in, several key troubleshooting steps must be taken. The first step, checking connections, is critical to identify any loose wiring or disconnections that could prevent power transfer. most of what we all call off grid systems are actually more accurately called a grid assist system.
