

Solar panels n-type double-sided double-glass solar modules

Overview

N-Type Dual Glass Solar Panels are the latest high-efficiency solar panels on the market. This 580w solar panel use double-sided transparent backplane technology and half-cut technology. Double-sided output, rear side power gain, increase power generation. This results in better light trapping and. Glass-glass solar modules (bifacial modules) increase energy production by approximately 2% to 5% compared to traditional glass-backsheet modules, thanks to their ability to capture light from both sides. Built on JA Solar's DeepBlue 4. Adpoted SunEvo lastest S-TOPCo 2. 0 technology, No polysilicon wrap around, Full electrical isolation, Zero leakage current; Much Safer for roof. Higher power output even under.
