

Solar panels on Cambodian roofs

Overview

Many companies, from small startups to multinationals, are exploring the potential for rooftop solar in Cambodia. However, despite the favorable natural factors, the regulatory framework was not always clear or friendly to rooftop solar, hampering investment. The Ministry of Mines and Energy (MME) has announced a new set of “Updated Principles for Permitting the Use of Rooftop Solar Power in Cambodia” under Prakas No. 0312, replacing the earlier Prakas No. 0312 (“2024 Principles”) replacing the “Principles for Permitting the Use of Rooftop Solar Power in Cambodia” issued by the MME in Prakas. PHNOM PENH, CAMBODIA (23 November) - One of the world's fastest growing countries recently launched Principles for Permitting the Use of Rooftop Solar Power in Cambodia, a document that will form the basis of a new regulation that will incentivize rooftop solar adoption, slated to be issued in. Cambodia has the potential to be one of the top countries in the world for generating renewable energy through solar, based on the average amount of sunlight hours available per day and the consistent sunshine throughout the year. The Cambodian government has recognized this potential and has made. The renewable energy landscape in Southeast Asia is dynamic and rapidly evolving, with Cambodia emerging as a country with significant solar potential. In this fast-paced environment, news of large-scale projects from major international players often generates considerable excitement.
