

# Solar power generation for public rental housing in

## Overview

---

This guide explores the benefits of solar energy for rental properties and practical steps for incorporating solar power into rental homes effectively. Cost Savings for Tenants. Homeowners, renters, businesses, and multifamily buildings can all access the benefits of solar power without installing panels on their property. Community solar projects generate renewable energy on behalf of multiple customers, who receive credits on their monthly electric bills for their share. The New York City Housing Authority seeks teams to develop community solar projects on its properties that benefit NYCHA residents and other Low- and Moderate-Income (LMI) households within the City. Although MFAH providers and households may wish to pursue the benefits of community. The National Community Solar Partnership (NCSP) convened the Multifamily Affordable Housing (MFAH) Collaborative in 2020 with the aim of expanding access to solar energy for MFAH residents nationwide by working with providers to identify and overcome challenges for community solar deployment. In a community shared solar (CSS) program, a large solar photovoltaic (PV) system provides power or financial benefit to multiple community members. CSS programs can expand access to solar power for renters, those with shaded roofs, and those who are unable to install a solar system on their home. The Environmental Protection Agency's (EPA) recent announcement awarding \$7 Billion to 60 states, Tribes, localities, and nonprofits represents a new and exciting frontier in deploying solar energy in low-income communities. Over the next several months, the EPA will finalize contracts with the.
