

Solar power industry trends

Overview

In this analysis, we examine the latest trends in installations, costs, and market dynamics, providing solar businesses, developers, and investors with a comprehensive picture of where the market is headed. The solar industry is on track for its biggest year ever. Global PV Deployment • In 2024, between 554 GW dc and 602 GW dc of PV were added globally, bringing the cumulative installed capacity to 2. The rest of the world was up 11% y/y. • The IEA. The global solar power market size was valued at USD 253. 69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436. 30%. Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry. Each presentation focuses on global and U. supply and demand, module and system price, investment trends and business models, and. Solar power companies have skyrocketed, propelled by improvements in the technologies used for electricity generation and government incentives, like the renewable portfolio standard (RPS) targets. As of September 2025, deployment numbers are soaring to new highs, yet industry players also face challenges like policy uncertainty, financing hurdles, and supply.

[The Outlook for Global Solar Energy Continues to Be Bright](#)

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global ...

[Global Market Outlook for Solar Power 2025-2029](#)

Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's share rose to 7% in ...

[The Future of Solar Energy: Top Solar Energy Trends in 2025](#)

In recent years, solar power has proven to be a key solution for reducing dependence on fossil fuels and mitigating climate change. As costs decrease and efficiency increase, the future of ...

[U.S. Solar Market Trends 2025 - Record Growth & Risks](#)

In this analysis, we examine the latest trends in installations, costs, and market dynamics, providing solar businesses, developers, and investors with a comprehensive picture of ...

[Spring 2025 Solar Industry Update](#)

- Together, utility -scale solar and wind generation accounted for more power than coal generation. - Solar overtook hydropower to be the second -largest source of renewable energy ...

[Solar Power Market Size, Share, Trends , Growth Report \[2032\]](#)

Over the past years, solar energy has been proven to be an important renewable energy source due to its limitless availability and environment-friendly nature, contradicting the finite fossil ...

[Solar Market Insight Report - SEIA](#)

In the months following the passage of the One Big Beautiful Bill Act (OBBBA), the solar industry has been adapting to new and not fully settled policy. Several uncertainties still hang over ...

[Solar Power in the US Industry Analysis, 2025](#)

Solar power companies are set to continue growing through 2030 as the economy improves. However, revenue growth is set to drop drastically compared to the current period, largely due to the One Big ...
