

Solar powered water pumps in Vanuatu

Overview

With 38 solar-powered water pumps already installed across Vanuatu and a goal of reaching 20,000 people, the program is creating a ripple effect of positive change, improving lives and building resilience in rural communities. The system utilizes renewable energy to pump clean, natural water, meeting the laundry, cooking, and drinking needs of over 400 residents as well as the. In a landmark ceremony yesterday, the Taloa Solar Water Pump Project on Nguna Island, was officially handed over to the Taloa Community by the Global Green Growth Institute (GGGI), marking a turning point for over 700 islanders who have long struggled with water scarcity. Funded by the government. A tender is open in Vanuatu to deliver eight solar water pump systems and 24 standalone solar PV systems. The deadline to submit expressions of interest is October 27. The Global Green Growth Institute (GGGI) is running a tender for the design, supply and installation of solar systems in Vanuatu. Thanks to the “Scaling-up Climate Resilience through Solar Power-Driven Access to Water” program, a new solar-powered water pump system was officially handed over to the. Over 4,700 people across eight rural communities in Vanuatu's Santo, Paama, Tanna, and Malekula islands will soon benefit from better water security, sanitation and hygiene, together with reliable, clean energy to power their health centres and schools.
