

# South american airports use 2mwh off-grid solar energy storage cabinets

**1mwh** (500kw/1mw)

AIR COOLING  
ENERGY STORAGE CONTAINER

## Overview

---

The Miami-based company is deploying the units at 11 undisclosed airports across Latin America. The energy storage systems will provide the airports with improved grid reliability in the event of blackouts, reduce their annual emissions and reduce their utility bills by. South America is the continent most dependent on renewable energy, but it is a market that has been difficult for the energy storage industry to penetrate – most South American countries have no storage regulations and offer few incentives, but Chile is leading the way. Given that South America is. Airports are transforming from massive energy consumers into clean power generators, marking one of the most significant shifts in aviation infrastructure since the jet age. Traditional airports operate like small. Energy storage can bring many benefits to electricity systems, including enhanced grid reliability, efficiency, and flexibility. It will also be a key enabler of mass decarbonization and climate change mitigation, facilitating the expansion of variable renewable energy sources such as wind and. Developer of fully integrated energy storage solutions On. Energy is expanding its battery energy storage system (BESS) solutions to select airports across Latin America, currently collaborating with Skysense to install more than 39 MWh of turnkey energy storage systems at 11 airports, adding to the. Analysis from Global Energy Monitor indicates the region has amassed a portfolio exceeding 319 GW of utility-scale solar and wind capacity across various development stages—from permitting to construction—with anticipated commissioning by 2030.

## South american airports use 2mwh off-grid solar energy storage ca

---

### [On.Energy to Install Battery Energy Storage Systems at ...](#)

On.Energy is collaborating with Skysense to install its battery energy storage systems (BESS) at 11 airports across South America.

### [South American Power Grid Energy Storage Solutions: Current ...](#)

South American power grid energy storage solutions are gaining momentum as countries like Chile, Brazil, and Argentina race to balance booming renewable energy production with grid

...

### [State of Charge: Energy Storage in Latin America and the Caribbean](#)

This publication examines the current and potential future roles for various energy storage technologies in LAC grids. It describes the main energy storage technologies being used internationally and the ...

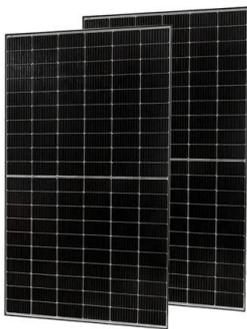

### [On.Energy Installing 11 Airport Battery Energy Storage Systems](#)

Battery energy storage systems are being installed by On.Energy at several airports in Latin America to help them improve energy reliability and cut carbon emissions.

[On.Energy expanding energy storage solutions for airports across ...](#)

To date, On.Energy has delivered and is currently accelerating BESS deployment for corporate, industrial, and utility customers across North America and Latin America, including ...

[Solar-Powered Airports \(2026\) , 8MSolar](#)

Discover how solar power is transforming airports, reducing emissions, and paving the way for green aviation.

[Atlas Renewable Energy - Powered by Excellence](#)

Energy storage is indispensable in ensuring grid stability and facilitating renewable energy integration across Latin America. As technological advancement accelerates and costs decline, storage systems ...

### [On.Energy deploying 39MWh of battery storage at LATAM airports](#)

The Miami-based company is deploying the units at 11 undisclosed airports across Latin America. The energy storage systems will provide the airports with improved grid reliability in the ...

### [South America: One of energy storage's final frontiers](#)

South America is the continent most dependent on renewable energy, but it is a market that has been difficult for the energy storage industry to penetrate - most South American countries ...

### [South America's Energy Storage Revolution: Tackling Grid Challenges](#)

Most South American countries still use merit-order dispatch systems that prioritize fossil fuels during low-demand periods. This creates negative pricing scenarios that actually punish renewable producers.
