

# Standard Atlas of Rooftop Photovoltaic Brackets

## Overview

---

The Federal Energy Management Program (FEMP) provides this tool to federal agencies seeking to procure solar photovoltaic (PV) systems with a customizable set of technical specifications. Select the plus sign in the rows below for more. Since PV is such a global industry it is critical that PV products be measured and qualified the same way everywhere in the world. IEC TC82 has developed and published a number of module and component measurement. Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground. What are mounting brackets & into two groups namely, Low power and High power. Low power PV installations are normally roof-top and microgrid, where the consumer has invested mainly for self- The Sturdy Foundation of Solar Energy Systems. This includes evaluating the roof's condition, orientation, and any potential shading from nearby structures or vegetation. roofs require different mounting solutions. Standard for safety UL/ANSI 2703, Mounting Systems, Mounting devices, Clamping/Retention.
