## Overview

---

Properly designed substation fire protection can minimize the effect of component failure during a fire on overall reliability of the system supply. The Order only applies to England and Wales but similar requirements are Fire Protection Guidelines for Energy Storage Systems. The storage should be equipped with fire control and extinguishing devices, with a smoke or radiation energy detection system. Fire detection systems protecting the storage. The Marioff HI-FOG ® water mist fire protection system offers superior performance in cooling down and suppressing high heat release rate flammable liquid fires, such as transformer fires. Reliable operation and instant activation are critical to safeguard the surrounding residents and property. Printed in the United States of America. g Recommendation (EREC) is published by the Energy Networks Association (ENA) and comes into effect from the date of publication. It has been prepared under the authority of the ENA Engineering Policy and Standards Manager and has been approved for publication by the ENA Electricity Networks and. Substations are an essential component of the nation's electric power infrastructure.
