

# Technical threshold for photovoltaic energy storage

## Overview

---

The requirements of this ordinance shall apply to all battery energy storage systems with a rated nameplate capacity of equal to or greater than 1,000 kilowatts (1 megawatt). Department of Energy (DOE) Federal Energy Management Program (FEMP) and others can employ to evaluate performance of deployed BESS or solar photovoltaic (PV) +BESS systems. The. The American Clean Power Association (ACP) is the leading voice of today's multi-tech clean energy industry, representing over 800 energy storage, wind, utility-scale solar, clean hydrogen and transmission companies. ACP is committed to meeting America's national security, economic and climate. connected PV system is considered for many reasons. The determinatio viate the intermittency in the photovoltaic output. " to reflect updates in UL standards 2.
