

Thailand base station power supply converted to charging

Overview

You will need to pack a Type B power adapter for Thailand if the plug you intend on using doesn't fit in a Thai power outlet. Thailand primarily uses three types of electrical outlets: The Type C outlet is becoming increasingly common in Thailand, especially in newer buildings and hotels. Many Thai outlets are actually hybrid designs that can accept both Type A/B (flat pins) and Type C (round pins), making them quite. The Thai power system is unique and you don't want to risk your devices breaking due to an incompatible or low-quality power adapter, or a power surge that is not supported by a trusty fuse protector. This is due to the many different types of plug and possible differences in voltage and frequency.
