

# The photovoltaic panel was broken during installation

## Overview

---

If you suspect solar panel damage, the first thing to do is contact the installation company or another qualified solar energy system repair outfit. The technician can accurately evaluate the type of damage and the extent of the problem. When it comes to solar, the pros outweigh the cons for the most part. This current should still be usable, but your panel won't operate at maximum. A broken solar panel can pose a serious risk, but the good news is that they don't break very often due to their ultra-durable construction and materials. This is a long-term investment that can last up to 20-30 years. Let's look at the common problems that can arise and how to deal with them! Can. This article will explore how to deal with broken or damaged solar panels effectively.
