

# Trina BIPV photovoltaic panel model

## Overview

---

The tailor-made BIPV module boasts a power density of 150 W/m<sup>2</sup> and an efficiency of up to 18%, suitable for different customized BIPV applications, like balcony solar and green buildings, etc. The company says the model's double-glass configuration yields a 32 kg/m<sup>2</sup> weight. Breaking world records for crystalline silicon cell efficiency and module power output since 2011. With maximum power output reaching 720W, the Vertex N series modules pioneer the industry's. High-Capacity Energy Generation: Offers solar panels with power outputs ranging from 380W to 665W, leveraging monocrystalline cell technology (TOPCon, HJT, PERC) for optimal efficiency (up to 22%). Building-Integrated Photovoltaics (BIPV): Designed for seamless integration into building structures. At the recently concluded SNEC 2024 event, Trina Solar's sister companies Trina Solar Evergreen and Trina Storage exhibited their respective colorful building-integrated photovoltaic (BIPV) module and commercial & industrial (C&I) battery energy storage system (BESS) solutions. More information can be found in the. Trinasolar Evergreen (Shanghai) PV Tech., a building-integrated photovoltaics (BIPV) unit of Trina Solar, has launched four new products for public, industrial, and infrastructure projects. Trina Solar aims to capture a share of the fast-growing BIPV market. Known for dependable solar panels that won't break the bank, the China-based solar panel manufacturer offers a middle ground between premium brands and budget options—and is popular among shoppers on the EnergySage Marketplace.

## Trina BIPV photovoltaic panel model
