

United States Monterey Base Station Energy Storage System

Overview

The Moss Landing Energy Storage Facility, the world's largest lithium-ion battery energy storage system, has been expanded to 750 MW/3,000 MWh. As of 2025, the site's battery storage facility is one of the largest in the world. The battery fire at Moss Landing in January made headlines and raised many questions regarding the history and future of battery storage in Monterey County and the State of California. This facility is supported by PG&E and operated by Vistra Energy. It plays a key role in utilizing renewable resources through innovative technology. Government nor any agency thereof, nor any of their employees, makes any warranty, expressed or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness, of any information, apparatus, product, or.
