

# Used solar panels for home use

## Overview

---

Used solar panels are usually much less expensive than new ones but will likely not be up to the same standards. Save on renewable energy with budget-friendly options for residential home and commercial solar projects. Panels have cracked vinyl on the exterior back sheet (moisture barrier is still intact). Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our evaluations, lender star ratings or the order in. Used solar panels aren't a bad idea if you know what to expect and know your way around used products. These products will never be as good as brand new solar panels – and that's okay. By choosing our open box options, you can enjoy significant savings without compromising on quality.
