## Overview

---

In this blog, we explore the top 10 sodium sulfur battery companies that are shaping the future of this innovative sector. These companies have been selected based on their market share, revenue. A sodium-sulfur (NaS) battery is a type of molten-salt battery that uses liquid sodium and liquid sulfur electrodes. Due to the high operating. (NGK), a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery) \*1. Sodium, the sixth most abundant element on Earth, is an attractive, low-cost material for industrial applications. They can additional power during demand peaks.
