

Was solar power generation possible thousands of years ago

Overview

Ancient cultures, including Greeks and Romans, harnessed solar energy for heating, lighting, and water heating systems over 2,000 years ago. 18th-century scientists like Horace de Saussure and John Dalton conducted pioneering experiments that laid the foundation for modern. Some forms of renewable energy we think of as modern were used thousands of years ago. Magnifying glass used to concentrate sun's rays to make fire and to burn ants. The history and evolution of solar energy is a fascinating journey that spans from ancient civilizations to the high-tech solar panels we see today. These early practices laid the groundwork for future advancements in solar technology. Around 7th century BCE, humans started.
