

# What is the problem with a broken photovoltaic panel

## Overview

---

Common causes of solar panel damage are falling objects, thermal stress, and micro-cracks and scratches. When it comes to solar, the pros outweigh the cons for the most part. If you notice any issues with your system, take quick action to prevent them from getting worse. Solar Panels Efficiency Issues Solar panels sometimes struggle. A broken solar panel can pose a serious risk, but the good news is that they don't break very often due to their ultra-durable construction and materials. The solar cells, responsible for converting sunlight into electricity, are protected by a glass cover and aluminum frame. However, solar panels are still susceptible to issues that cause them to. Often connection issues are a simple fix that doesn't require a service technician to repair solar panels.
