

Wind and Solar Power Generation Army Day

Overview

Defense Logistics Agency Energy and other stakeholders broke ground Jan. 28 on the Army's first-ever hybrid solar and wind energy project, made possible through a contract awarded Jan. Army Corps of Engineers today announced that it will waive day use fees at its more than 2,800 USACE-operated recreation areas nationwide in observance of Presidents Day, February 16. Army Corps of. On Septem, the Assistant Secretary of the Army for Civil Works issued a memorandum directing the U. The military's demand for inexpensive, hard-to-disable power for its constellation of bases has driven it to collaborate with civilian contractors in exploring a new generation of "off the shelf" clean tech. Military bases have played a similar role since the Obama era in helping to "de-risk" other. This shift represents a strategic decision reshaping combat readiness and base resilience. Fort Bragg in North Carolina stands out with its 1.
