

Wireless outdoor base station supply method

Overview

Power supplies can be employed in each of the three systems that compose wireless base stations. This acts as the “blood supply” of the base station, ensuring uninterrupted power. It includes: AC distribution box: Distributes mains power and offers surge protection. Battery banks: Serve as backup power to keep. TP-LINK's 5GHz 300Mbps * Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. Each of these systems is in turn divided into smaller sections and. ed in close proximity to the antenna tower. for uninterrupted power supply through hybrid energy sources Easy management of installation and deployment, with remote operation and maintenance functions Wall-mounted, pole-holding, floor-mounted and other different installation.
