

Xingheng Power enters photovoltaic energy storage

Overview

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been connected to the grid in Ngari Prefecture, southwest China's Xizang Autonomous Region. On the morning of April 10, in the Sino-Suzhou-Chuzhou High-tech Zone, the construction of the 4GWh lithium-ion battery project of Xingheng Power Supply (Chuzhou) officially kicked off. The total investment of the project is as high as 1.83 billion yuan, and it is expected to be completed by the end of the year. Xingheng energy storage battery is increasingly recognized for its innovative technology and robust performance in the energy storage sector. The company has positioned itself strategically in both domestic and international markets.
