

Xinping cracks down on theft of solar photovoltaic panels

Overview

The undocumented devices were found after U. experts disassembled the renewable energy equipment to check for security issues, prompting officials to review the potential dangers of the Chinese-made devices, according to the publication. The problem here is, those communication devices found in Chinese made solar panels were not disclosed in the documentation by the manufacturers. “It very much fits into the model of China implanting hardware in American critical infrastructure for the purpose of planning cyberattacks against. Every solar panel and battery connected to the U. But that reliance may come with a serious risk.
