

Yingli photovoltaic panel parameters 280

Overview

The YL280P-29b/1500V solar panels have a rated output of 280 Wp and an impressive efficiency of 16.8 %, making them an excellent choice for homeowners looking to harness the power of the sun and reduce their energy costs. With over 2GW of modules installed globally, we are a leading solar energy company built upon proven product reliability and sustainable performance. Homeowners can also pair these panels with energy storage solutions, such as home batteries, to store excess energy for use during peak hours or in case of power outages. free 12V power source professional and DIY applications. 70% which are high-efficiency ratings. Meanwhile, in land scarcity areas, the distance between modules has been shortened to increase the installed capacity and thus further improve power.
